The screenshot shows the VS Code editor interface for a project named 'TALENCIAQUIZAPPLICATION'. The Explorer sidebar on the left displays the project structure, including folders for 'node_modules', 'src', 'app', 'header', 'question', 'service', 'welcome', 'assets', 'environments', and 'test.ts'. The 'question' folder is selected, showing files like 'question.component.html', 'question.component.scss', and 'question.component.spec.ts'. The 'question.component.ts' file is open in the editor, showing the following code:

```
1 import { Component, OnInit } from '@angular/core';
2 import { interval } from 'rxjs';
3 import { QuestionService } from '../service/question.service';
4
5 @Component({
6   selector: 'app-question',
7   templateUrl: './question.component.html',
8   styleUrls: ['./question.component.scss']
9 })
10 export class QuestionComponent implements OnInit {
11
12   public name: string = "";
13   public questionList: any = [];
14   public currentQuestion: number = 0;
15   public points: number = 0;
16   counter = 0;
17   correctAnswer: number = 0;
18   incorrectAnswer: number = 0;
19   interval$: any;
20   progress: string = "0";
21   isQuizCompleted: boolean = false;
22   constructor(private questionService: QuestionService) { }
23
24   ngOnInit(): void {
25     this.name = localStorage.getItem("name")!;
26     this.getAllQuestions();
27     this.startCounter();
28   }
29 }
```

The bottom of the editor shows the 'TERMINAL' tab with the following output:

```
Did you mean "analytics"?
(base) ilahotid@ILAHOTI-M-L7CF TalenciaQuizApplication % ng serve
Your global Angular CLI version (13.0.2) is greater than your local version (12.2.13). The local Angular CLI version is used.
To disable this warning use "ng config -g cli.warnings.versionMismatch false".
✓ Browser application bundle generation complete.

Initial Chunk Files | Names | Size
vendor.js | vendor | 2.46 MB

** Angular Live Development Server is listening on localhost:4200, open your browser on http://localhost:4200/ **

✓ Compiled successfully.
```

The image shows a screenshot of an IDE with a file explorer on the left, a code editor in the center, and a terminal at the bottom.

File Explorer: The project is named `TALENCIAQUIZAPPLICATION`. It contains a `node_modules` directory and a `src` directory. The `src` directory has subdirectories `app`, `header`, `question`, `service`, and `welcome`. The `service` directory contains `question.service.spec.ts` (selected) and `question.service.ts`. The `welcome` directory contains `welcome.component.html`, `welcome.component.scss`, and `welcome.component.spec.ts`.

Code Editor: The file `question.service.spec.ts` is open. It contains the following TypeScript code:

```
1 import { TestBed } from '@angular/core/testing';
2
3 import { QuestionService } from './question.service';
4
5 describe('QuestionService', () => {
6   let service: QuestionService;
7
8   beforeEach(() => {
9     TestBed.configureTestingModule({});
10    service = TestBed.inject(QuestionService);
11  });
12
13  it('should be created', () => {
14    expect(service).toBeTruthy();
15  });
16 });
17
```

Terminal: The terminal shows the output of the `ng serve` command. It includes a warning about the Angular CLI version mismatch and a table showing the initial chunk files and their sizes.

Did you mean "analytics"?

(base) ilahotia@ILAHOTI-M-L7CF TalenciaQuizApplication % ng serve

Your global Angular CLI version (13.0.2) is greater than your local version (12.2.13). The local Angular CLI version is used.

To disable this warning use "ng config -g cli.warnings.versionMismatch false".
